

HAYTAME EL ATRAOUI

INDUSTRIAL DIGITAL TRANSFORMATION ENGINEERING STUDENT

Morocco • +212 696 547 432 • haytameelatraoui@gmail.com • LinkedIn • GitHub • Portfolio

PROFILE

Industrial Digital Transformation engineering student with a Computer Science & Database Engineering foundation. I build reliable digital solutions for real operational needs across software, enterprise systems, cloud, data and automation, with hands-on practice in cyber risk and industrial environments.

PFE 2027 • available from February 2027

CORE CAPABILITIES

SOFTWARE & APIS

Python • Java/Spring Boot • FastAPI • REST • JWT

ENTERPRISE & AUTOMATION

SAP ERP • Excel/VBA • n8n • Jira • Apps Script

CLOUD & DATA

Azure IaaS • Docker / Compose • Linux • SQL / PL/SQL • Power BI

CYBER & INDUSTRY

ISO 27001/27005 • Nmap/Wireshark • IIoT • MQTT

LANGUAGES

Arabic — Native

English — C1

French — B2

PROFESSIONAL EXPERIENCE

Quality & Industrial Digitalization Intern | Safran - Quality Department

Aug - Sep 2026

Nouaceur, Morocco

- Mapped a quality workflow across SAP ERP, Excel and VBA, translating business rules and manual steps into an automation approach.
- Built Python/VBA solutions; a standalone Python tool processed SAP exports, generated standardized AD/SB outputs and was validated on 4,500+ records with configurable rules and documentation.

Mobile Software Engineering Intern | Zenithsoft

Jun - Jul 2026

Rabat, Morocco - Remote

- Built an offline-first Flutter field-service app with SQLite, REST synchronization, JWT, geolocation, notifications, signatures and reporting.
- Worked in Scrum/Kanban sprints with Git, focusing on data consistency and API integration.

Industrial Methods & Operations Intern | COSUMAR

Sep 2025 (1 month)

- Observed production, maintenance/GMAO and operational data flows, focusing on traceability, KPI reporting, information reliability and digitalization opportunities.

Full-Stack Web Developer - Final-Year Project | École Kobaa

Feb - Jun 2024

Mohammedia, Morocco

- Co-developed a school-management application for multiple user roles, from requirements and workflow design to implementation.
- Contributed to normalized MySQL modeling, validation, documentation and final presentation.

EDUCATION

Engineering Degree - Industrial Digital Transformation

ENSA Beni Mellal / Sultan Moulay Slimane University
2024 - Present

Software Engineering · Cloud & Virtualization · Database Engineering · Big Data · Industrial IoT · Automation · Industrial Cybersecurity · Optimization · Smart Factory

Bachelor's Degree - Computer Science & Database Engineering

Faculty of Sciences Ben M'Sik / Hassan II University of Casablanca
2023 - 2024

SQL & PL/SQL · Database Administration · Relational Modeling · Java/JEE · Web Development · UML · Networks

CLOUD & SECURITY PRACTICE

Cloud & Containers

Azure IaaS: Ubuntu VM, SSH/HTTP, storage & Apache · Docker multi-service: Nginx, PostgreSQL, pgAdmin, volumes & networks

Network & Web Security

Nmap · Wireshark · tcpdump · Kali Linux · SSH/sudo · DVWA · SQLi · XSS · CSRF · MITM / ARP poisoning

CTF 12 h

Hands-on web, cloud and multimedia challenges; structured flag investigation and problem solving.

LEADERSHIP

President - Club ENSA Industry 4.0

Team coordination, technical events, industrial visits, partnerships and technical communication.

FEATURED PROJECT

Cyber Risk Management Automation

Jira · Google Sheets · Google Apps Script · REST API · ISO 27001/27005

- Built a risk register covering asset, threat, vulnerability, likelihood, impact, score, treatment, owner and status, with critical-risk prioritization.
- Automated Jira remediation-ticket creation for critical risks through Apps Script and REST API, with Jira-key traceability and duplicate prevention.
- Built a KPI/KRI dashboard in Google Sheets to track critical risks, treatment plans and remediation status.

SELECTED ENGINEERING PROJECTS

GMPP - Industrial Maintenance Platform | Java / Spring Boot / PostgreSQL / React / Docker

Academic project

- Developed an enterprise-oriented maintenance platform covering equipment, interventions, inventory, reporting, roles/RBAC and REST-based workflows in a containerized architecture.

OptiStock Solutions v2.0 - Warehouse Decision Support | Next.js / FastAPI / Python / OR-Tools / IoT

Academic project

- Co-developed a full-stack platform for warehouse location/logistics optimization and temperature/humidity monitoring; role focused on full-stack architecture and UI/UX.

Critical Machine Alert Automation | n8n / REST API / MongoDB / SMTP

Personal workflow

- Built a scheduled workflow to normalize machine data, evaluate critical thresholds, send email alerts, log non-critical states and handle workflow failures.

INTERNATIONAL PROJECT

RIFQA - Real-Time Group Navigation & Safety | UH2C / ENSEM Casablanca

Jul 2026

- Co-developed a React/Firebase/Leaflet solution with real-time synchronization, geolocation and pedestrian routing in a 7-member English-speaking team; contributed to final presentation.

ENGINEERING FOCUS

Open to final-year internship and strong early-career engineering opportunities where software, enterprise systems, cloud/automation, data and industrial processes meet. Long-term direction: technical ownership, architecture and digital transformation leadership.
