

HAYTAME EL ATRAOUI

INDUSTRIAL DIGITAL TRANSFORMATION ENGINEER

Casablanca, Morocco | +212 [phone] | [email] | LinkedIn | GitHub

PROFESSIONAL PROFILE

Industrial Digital Transformation engineering student with a Computer Science & Database background, combining software engineering, enterprise systems, data analytics and Industry 4.0. Hands-on experience in industrial quality digitalization, ERP-related workflows, Python/VBA automation, mobile field-service applications and data-driven projects. Strong interest in industrial digitalization, ERP, software/data engineering and connected systems.

PROFESSIONAL EXPERIENCE

Quality & Industrial Digitalization Intern | Safran · Aug-Sep 2026

- Analyzed and improved an industrial quality data-processing workflow involving SAP ERP, Excel and VBA.
- Developed and validated automation solutions using VBA and Python to reduce manual processing and standardize recurring operations.
- Developed a standalone Python desktop application for automated processing of SAP-generated Excel files and generation of standardized deliverables.
- Designed configurable business rules and reusable Excel templates to facilitate maintenance and adaptation of the solution.
- Validated the solution on datasets containing 4,500+ records and designed it for direct use by operational teams.

Mobile Software Engineering Intern | Zenithsoft, Rabat · Remote · Jun-Jul 2026

- Independently designed and developed a cross-platform mobile application for technical intervention and field-service management.
- Implemented an offline-first architecture with SQLite and automatic synchronization with a REST API.
- Built technician, manager and administrator workflows including GPS/geolocation, mapping, notifications, electronic signatures, reporting and role-based access control.
- Structured the application into modular services/features and produced release builds with Flutter.

International Summer School Participant & Project Developer | UH2C International Summer School · ENSEM Casablanca · Jul 2026

- Participated in an intensive international program conducted in English, combining seminars, hands-on workshops, professional visits, teamwork challenges and a hackathon.
- Contributed to RIFQA, a real-time group navigation and safety application using React, Firebase and Leaflet.
- Contributed to interactive maps, real-time location synchronization, geolocation, pedestrian routing and collaborative communication.
- Contributed to final product demonstration and presentation before a jury.

EDUCATION

Engineering Degree — Industrial Digital Transformation | ENSA Béni Mellal · Université Sultan Moulay Slimane · 2024–Present

- Engineering cycle focused on industrial digitalization, software systems, data, cloud, IoT, automation, maintenance and Industry 4.0.

Bachelor’s Degree — Computer Science, Database Engineering | Faculty of Sciences Ben M'Sik · Hassan II University of Casablanca · 2023–2024

- Focus on databases, software development, data processing and information systems.

DEUG — Mathematical & Computer Sciences | Hassan II University of Casablanca · 2021–2023

Baccalaureate — Mathematics Sciences A | Morocco · 2021

SELECTED PROJECTS

GMPP Suite — Enterprise / ERP Platform · 2026

Full-stack enterprise application work combining business workflows, backend services, data management and modern web interfaces. Java/Spring Boot, React, PostgreSQL, Docker.

OptiStock Solutions — IoT & Logistics Decision Support · 2025–2026

Decision-support platform for logistics storage optimization using data analysis, optimization concepts, interactive visualization and IoT-oriented architecture. Python, Streamlit/Flask, SQLite/CSV, Plotly, Folium.

Industrial OEE Analytics Dashboard · 2025–2026

Data-driven dashboard for monitoring industrial performance indicators and supporting production analysis using Python, Pandas and visualization tools.

RIFQA — Real-Time Group Navigation · 2026

Collaborative navigation and safety application for groups in crowded environments. React, Firebase Firestore, Leaflet/OpenStreetMap, routing APIs, real-time synchronization and geolocation.

LEADERSHIP & ACTIVITIES

President — Club Industrie 4.0 | ENSA Béni Mellal · 2025–2026

- Led student activities around Industry 4.0, coordinated events and supported technical/professional initiatives.

Organizer — Moroccan TSP Competition | ENSA Béni Mellal · USMS · 2025–2026

- Contributed to organization and coordination of a national student competition focused on the Travelling Salesman Problem and real-life logistics applications.

Moderator — Public Speaking Competition | ENSA Béni Mellal · 2025

- Moderated a public-speaking event and developed public communication and facilitation skills.

Participant — Cybersecurity CTF | ENSA Béni Mellal · 2026

- Participated in a full-day hands-on Capture The Flag cybersecurity competition.

TECHNICAL SKILLS

Programming: Python, Java, Dart, JavaScript/TypeScript, SQL, PL/SQL

Backend & Web: Spring Boot, FastAPI, Flask, React, Next.js, REST APIs

Enterprise & ERP: ERP workflows, business process analysis, Odoo, SAP ERP exposure

Data & Analytics: Pandas, NumPy, Matplotlib, Plotly, data processing, dashboards

Databases: PostgreSQL, MySQL, SQLite, relational database design

Industrial / IoT: Industry 4.0, IoT, ESP32, MQTT, industrial digitalization, maintenance & logistics

DevOps & Tools: Git/GitHub, Docker, Linux, VS Code, Jupyter, VirtualBox, OpenStack, n8n

AI / Digital: AI-assisted development, computer vision, automation and digital productivity tools

LANGUAGES & CERTIFICATIONS

Arabic — Native | English — C1 (Certified) | French — B2

Rosetta Stone — English Certificate | Public Speaking Event — Participation Certificate
